Provide a brief explanation why any checked services were not included in the assessment:

Part 2b. Description of Payment Card Business

<p>Describe how and in what capacity your business stores, processes, and/or transmits cardholder data.</p>	<p>Fondy is an Internet Payment Service Provider providing payment services to small and medium online shops via its payment solution. In order to offer affordable payment services Fondy supports processing of MasterCard and VISA card payments via its partners, acquiring banks and payment service providers. All data between clients, web servers, and acquiring banks are transmitted over encrypted TLS channels. Company's web server uses only trusted certificate issued by Comodo RSA CA. As a result of the provided services, sensitive authorization data (security verification code or value) is collected, however it is only kept in server's memory in an encrypted format for the duration of the authorization process, which is always performed online and in real-time. A dedicated encryption server performs AES 256 encryption of PANs and expiration date, both of them are stored encrypted in PostgreSQL database. Cardholder name is stored unencrypted. Sensitive authentication data from the website (CVV2, CVC2) is transmitted via web servers to the acquirers and processors, for authorization. The SAD is not stored in local databases nor in any other format.</p>
<p>Describe how and in what capacity your business is otherwise involved in or has the ability to impact the security of cardholder data.</p>	<p>N/A</p>

Part 2c. Locations

List types of facilities (for example, retail outlets, corporate offices, data centers, call centers, etc.) and a summary of locations included in the PCI DSS review.
